ABSTRACTED-PUB-NO: SU 1412784A

BASIC-ABSTRACT:

The contracture treatment method involves working the joint while treating the surrounding soft tissues with pneumatic massage for 15-20 min. In the device used, the sockets hold pneumatic cuffs (8,9) in the form of communicating chambers joined to a pressure source and to the atmosphere through a distributor (18) with manual working organ drive.

ADVANTAGE - The contracture treatment method takes less time.
